Redstar Sonic Signalman Web Based Remote Tank Contents Management

Redstar brings to you the latest in remote tank contents management technology with the introduction of the Redstar Sonic Signalman system. We have combined a cost effective, all in one, plug and play tank contents measurement and communication device with a state of the art web based information portal to provide you with accurate and timely information relating to your tank contents.

The Redstar Sonic Signalman module is a cost effective, ultrasonic tank gauge featuring an accuracy of +/- 3% when fitted with Wave Guide Drop Tube. The module is supplied with an integrated long life battery pack and GSM Modem providing full communications back to the Redstar Connect Sensor Web Server.

Access your tank contents information via our Connect Sensor Web Portal, we will even send you a regular email keeping you up to date with your tank contents data.

Proactively manage either your own, or your customers, tank contents. Liquids distributors can use the Redstar Sonic Signalman system to vendor manage their customers liquids stocks. The module is suitable for use with all NON Flammable Liquids.

Redstar Connect Sensor Web Based Information Portal

- connectsensor.com has been developed to provide the brains behind the Redstar Sonic Signalman module.
- Full control of your information is provided through the connect sensor web based portal.
- The portal provides a powerful interface between your in field tank module and the valuable data being collected over time.
- Many and various reports can be exported in numerous formats to be integrated with your existing business systems.

"All you need is mobile phone range, a spare tank port, a tape measure and a pen"

"I am a Liquids Distributor, so what can Redstar Sonic Signalman do for ME?"

- This product will completely change the way you despatch / plan your loads. Redstar Sonic Signalman will allow you to proactively, rather than reactively, manage your delivery logistics. No longer will you get the call "I've run out of diesel, can you have a truck here tomorrow" – Redstar Sonic Signalman will allow you to keep one step ahead of the game.
- It's all about differentiation - Redstar Sonic Signalman will set your business apart from your competitors in your customers eyes.
- Redstar Sonic Signalman will increase your customer retention rates, why would they use a competitor, when their fuel just turns up.
- Protect your tank assets by being able to remotely see if customers are filling via a competitor.
- Redstar Sonic Signalman offers features and benefits that your customer would be willing to pay for!!!
